

EXPERIMENT 25:

AIM:

To generate text using GPT.

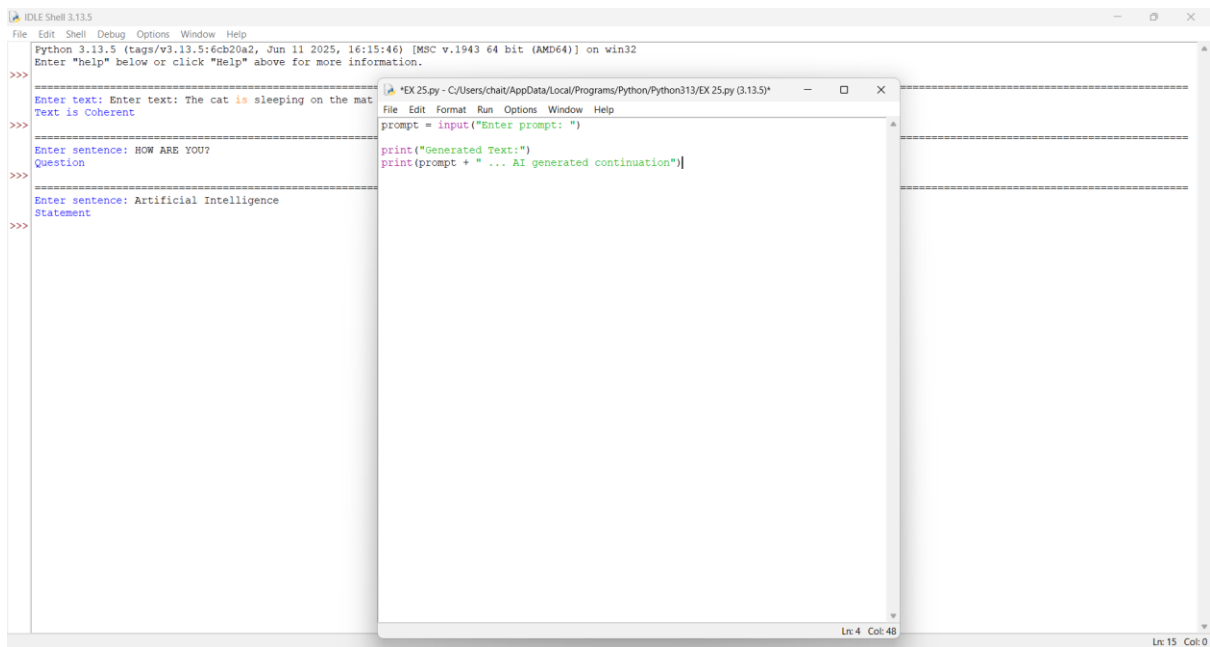

PROGRAM:

```
prompt = input("Enter prompt: ")
```

```
print("Generated Text:")
```

```
print(prompt + " ... AI generated continuation")
```

OUTPUT:

The screenshot displays two windows from the Python IDLE 3.13.5 environment. The background window is the 'IDLE Shell 3.13.5', which shows the program's execution. It starts with a prompt 'Enter text: Enter text: The cat is sleeping on the mat' followed by 'Text is Coherent'. Then, it prompts 'Enter sentence: HOW ARE YOU?' followed by 'Question'. Finally, it prompts 'Enter sentence: Artificial Intelligence' followed by 'Statement'. The foreground window is the 'EX 25.py' editor, showing the source code:

```
prompt = input("Enter prompt: ")
print("Generated Text:")
print(prompt + " ... AI generated continuation")
```
